Recycle Policy of KARE

As an education institute, KARE produces wastes such as waste paper, cardboard, computers, electrical and electronic equipments, toner cartridges, cans, textiles, plastics, glass, batteries, wood and fluorescent light tubes. When reuse is not possible, KARE is committed to recycle as much as possible.

The aims of KARE towards Recycling are to:

- Adhere to the regulatory requirements of all relevant legislation and be a role model in maintaining higher standards
- Collect the examination answer scripts and other paper waste and produce for recycling
- Increase the usage of treated waste water for gardening and other non-human contact uses
- Increase the production of manure for agriculture from bio-degradable waste generated from the institute
- Supervise continuously and review at regular intervals the recycling processes through audit
- Create and innovate strategies and methods to implement for improving recycling efficiency
- Provide need based training for creating awareness on recycling principles among students and staff
- Monitor the contractors and operators on the institute campus to comply with the requirements of this policy

Dr. V. Vasudevan

Registrar

REGISTRAR

Kalasalingam Academy of Research and Education
(Deemed to be University)
Anand Nagar, Krishnankoil - 626 126.
